## ABOUT US

Our company, Binsekiz LLC, is founded for the purpose of the producing, importing and exporting. Our headquarter is located in Çayyolu and our factory is located in Ostim, Ankara, Turkey.

Our company began producing the seam-free Electric Under Blankets for the first time in Turkey thanks to the custom made machinery, which are designed and manufactured by us. As the result of the investments, made in subsequent years, our company has experienced a steady growth both in terms of capacity and product diversity. Apart from the Electric Under Blankets, the production industrial heaters took off as well. electric heating pads and auto heating pads, electric boot warmers and battery powered shoe sole heaters, were initiated as well.

Our plastic injection molding facility, established to manufacture semi-products, has expanded as we commissioned new machines to our pool. Further investments on machinery, moulds and R&D resulted in the production of a wide range of plastic home articles such as the crystal and plastic cloth hangers, clothespins, bathroom stools and lockable lid storage containers, waste bins, shoe boxes and ramps, cutlery sets and different types of organizers. The initiatives that we undertook regarding the home textile division were reflected onto our investments as four lamination bands, silicon and fiber dispersion machine and automatic filling machines. The new products that joined to our lineup in home textile range are Fleece Blankets, Fire Retardant Ironing Board Covers, Bathroom Mat Sets, Polyester Bathroom Shower Curtains, Duck Fabric Kitchen Apron Sets, Duck Fabric Table Clothes, Lace Pillows, Silicon Pillows etc.

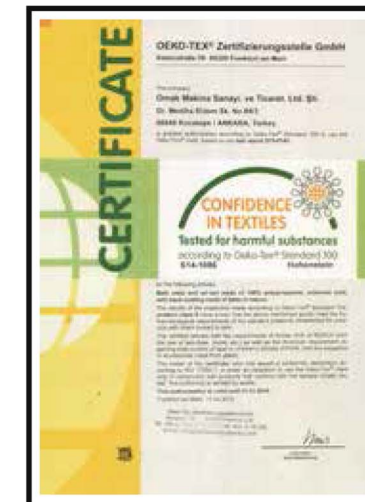

Binsekiz LLC also engages with import activities and audits its suppliers regularly. Our Company uses its registered trademark of Binsekiz on its Home Textile, Bathroom Accessories, Bathroom Textile and Hardware Groups.

Due to our competitive structure for all products that we manufacture in terms of quality, capacity and pricing, we have strong export activities in different countries. As the result of our export transactions, Greece, Germany, Romania, Morocco, Serbia, Russia, Azerbaijan, Bulgaria and Israel joined into our foreign client list.

Binsekiz LLC, with its ever increasing product range, quality and reasonable prices, has become one of the largest suppliers in market chains in Turkey and Europe. In addition to the sales that we undertake to DIY markets, Hyper Market and Discount Market Chains by our own brands, we undertake manufacturing and exporting activities to various national chain markets.

With our Management Approach that constantly aims better in terms of product and service quality and with our mission and vision with the purpose of steady growth in the fields of manufacturing, export and import, Binsekiz LLC shall continue making a name for itself.

## Electrical Under Blanket

The Electric Blanket is a product, made for you to have a comfortable sleep during the cold winter days. It should be laid onto a bed with suitable dimensions between the bed and the sheets without making any folding or wrinkling.

If the switch is set to "hot" position after the blanket is plugged in, your bed shall be as warm as you can feel the heat approximately within half an hour.

It used by lying onto it until the morning. In case the temperature is too excessive, the switch should be taken to "warm" position. This temperature is at a level, in which you may sleep safely until the morning while your blanket is switched on.

Since the electric blanket is manufactured for you to have a comfortable night without feeling cold or sweating, its temperature is adjusted to bed conditions. You cannot understand whether it works or not simply by operating it outside the bed or by touching it by hand.

Attention should be paid to the point that no shrinkages or wrinkles form in case of the depressions that may occur in cotton and wool beds. The blankets are manufactured in three types, Single, Double and Dual with double control.

## The Benefits of the Electric Blankets

- The fact that it directly heats up the bed eliminates the need to heat up the whole room thus provides energy saving.
- It eliminates the humidity of the bed.
- It refreshes the body,
- Helical heating elements are being used inside the blanket.
- PVC insulation that is resistant to 120° is applied.

Usage for Local Heater

It should be ensured that the product is not wrinkled or folded on the area, where the product shall be used.  
The product requires no external case or jacket.  
In order to prevent heat loss, covers like a scarf or blanket can be placed onto the product.  
The product operates on grid power thus requires no additional hardware.  
The product should be plugged out when not in use.

The Properties of the Temperature Control Card for Local Heater

It controls the temperature with an accuracy of 1°  
Thanks to the light indicator on it, the switch on and off status can be monitored.  
It provides ease of use by storing the intended temperature into memory  
It has a keylock feature if desired.

The Use of the Controller for Local Heater

The controller enables you to make five different temperature adjustments.  
The temperature is increased with the Red arrow (Up) and is decreased with Blue arrow (down)  
The heater is switched off when the Red Arrow button is pressed long and in the same manner, a switched off heater is switched on by pressing the Red arrow long.
